12-16 Months

First annual boosters for all vaccines

Rabies booster (1-year vaccine)

Every 1-3 Years

Rabies booster (as required by law)

DHPP booster

Other boosters as recommended by vet

Vaccine Checklist

- ☐ Schedule puppy/kitten series vaccinations
- ☐ Mark vaccination dates on calendar
- ☐ Keep vaccination records in safe place
- ☐ Ask vet about local disease risks
- ☐ Discuss vaccine reactions with vet
- ☐ Update tags/license after rabies vaccine
- ☐ Schedule annual wellness exam

Important Notes:

- Vaccination schedules may vary based on your pet's health, lifestyle, and local regulations

Some vaccines require multiple doses for full protection

Keep records of all vaccinations for boarding, grooming, and travel

Report any adverse reactions (swelling, vomiting, lethargy) to your veterinarian immediately

Discuss titer testing with your vet as an alternative to automatic boosters

Core vaccines are recommended for all pets, while non-core vaccines depend on risk factors

Puppies and kittens need a series of vaccinations to build immunity

Regular vaccinations are essential for your pet's health and required by law in many areas

Consult with your veterinarian to create a personalized vaccination plan
